Policy Objectives:

- To use LED/CFL bulbs and other energy-saving devices on the campus.
- To efficiently use energy from all sources.
- Trap renewable sources of energy including solar energy.
- To conduct energy audit from time to time.

Infrastructural Initiatives

Energy Saving: The staff members and students lead initiatives to save significant electricity and have developed a policy for reducing electricity consumption by using LED and replacing the old tube lights with LEDs. The students commuting from far-off places use the public transport system as the bus pass facility at subsidized rates is extended to them by the college which is provided by state Govt. Many of the staff members use car-pooling and/or two wheelers. All the computer monitors have been replaced with LED/LCDs displays. Replacement of old appliances like lights, fans with energy-efficient appliances is underway. The process of the paperless office and use of e documents for routine work has been started.

Renewable Sources of Energy

The institution believes in self sustainability and energy conservation. To minimize the usage of electricity in the institution we are switching to renewable sources of energy like solar energy. A 50kW solar power plant was installed on the roof top. Biogas Plant was also constructed.

ORGANIZATION WIDE AWARENESS

Posters/ Slogans

Notice board

Awareness programs and Celebration of National days

This policy will be communicated to the students and employees via internal communication channels, and will be made available to all the stakeholders on the institutional website. The Environment and Energy Policy, objectives and targets will be reviewed on a regular basis by the Principal of the college.

Use of Alternate Sources of Energy

Solar Power Plant

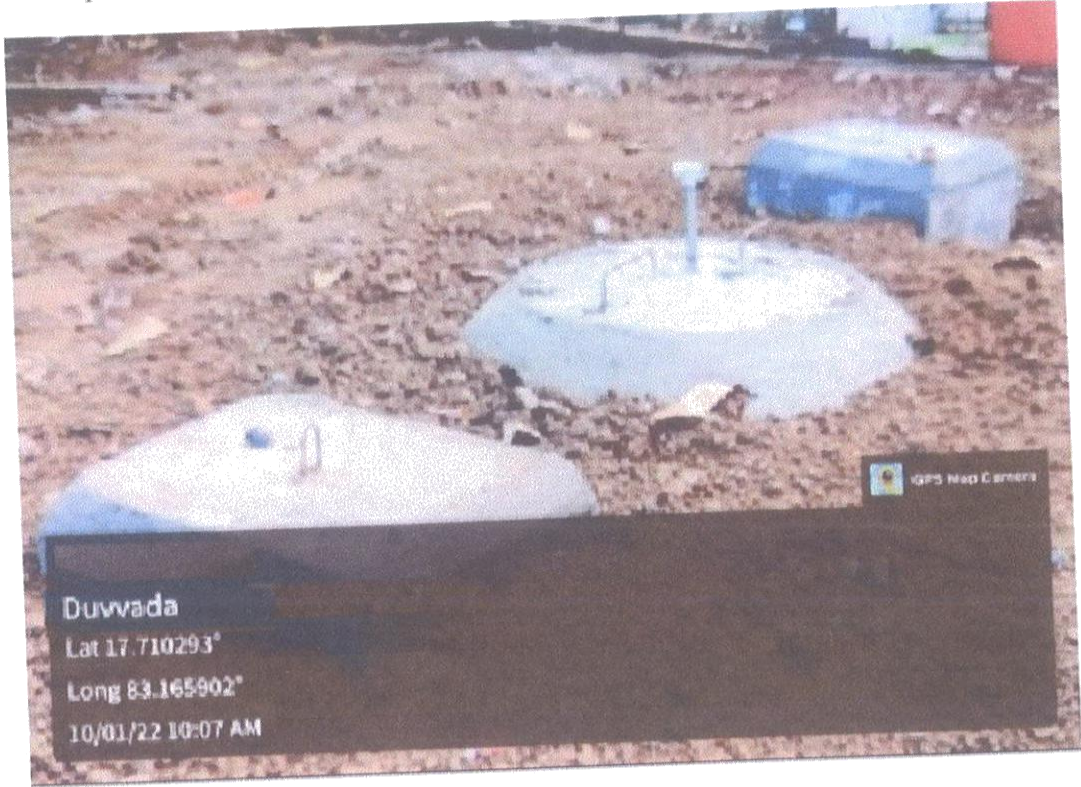

the institute has installed a solar power plant on the roof top with a capacity of 50kW. This produces 50kW direct current. This energy is used as power backup supply. Solar energy further helps in the reduction of carbon footprints.

Energy Conservation Measures

Use of LED/Power Efficient Equipment

The Institution uses fluorescent tube lights of 36W, LED tube lights of 20 W and ceiling LED lights of 15W. LED lights are a good alternative to save energy and are environment friendly. To reduce power consumption most of the fluorescent tube lights are replaced with LED Bulbs. LED Screens in Computer and digital library.

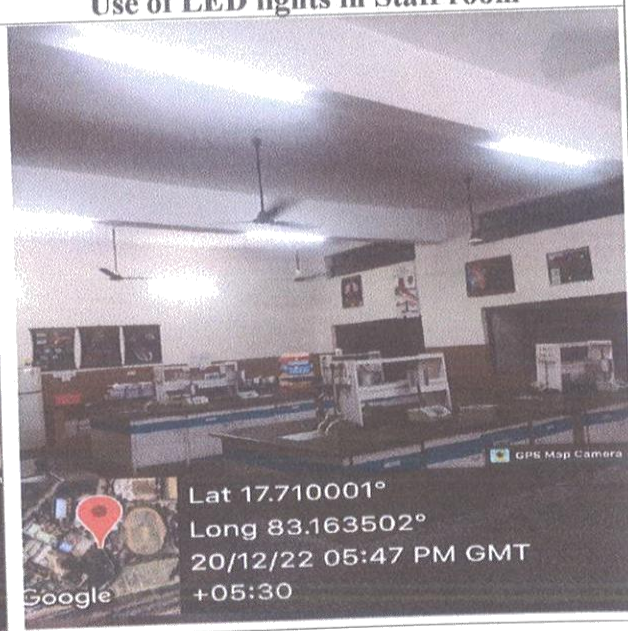

Use of LED lights in Corridors

Use of LED lights in Staff room

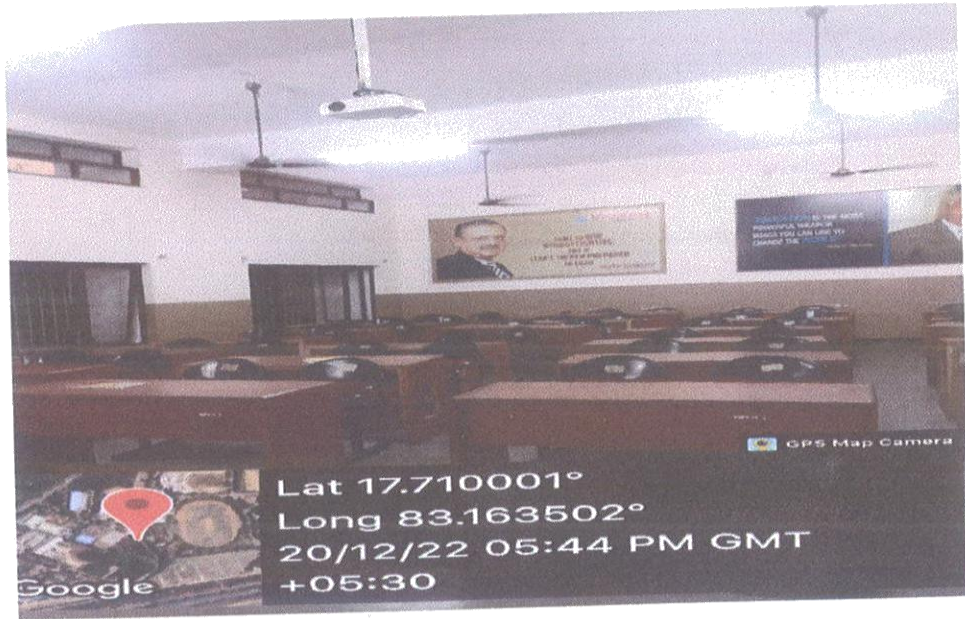

Use of LED lights in Library

Use of LED lights in Laboratory

Energy Conservation Measures

Sensory Based Energy Conservation

Automatic control of lollipop lights is designed to turn on and off lollipop lights automatically. If 80% light is available it will automatically turn off the lollipop lights and vice versa.

Mr. Hari Govind – Dean, VIT	Contact Person: Mr. Dadi Vinay 7989050470

Dear Sir,

With reference to your order confirmation, we completed setup of 5000Lt Biogas plant at your college Canteen. With reference to confirmation dated on 3rd May, 2022; Quotation No: WM/AP/22-23/12R1, we are submitting our Invoice to release balance payment. Please find Invoice details below for your reference.

S. No	Item Description & Specifications	HSN / SAC	Unit rate in Rs.	UOM	Total Price in Rs.	
1	Service Charges for setting up 5000lt Biogas Plant – Fixed type in Civil construction	998393	30,000.00	01	30,000.00	
	Charges for Rod bending team and Skilled Masons for constructing 5000lt Biogas Plant – Fixed type	998393	25,000.00	01	25,000.00	
Total Charges for Technical Service approved is					55,000.00	
				CGST	9%	4,950.00
				SGST	9%	4,950.00
Grand total					64,900.00	
Advance payment received					25,000.00	
Balance Payment to be processed is					39,900.00	

We are very thankful for this opportunity

We assure our best services to meet all your needs in Green Energy Solutions
